Foreword

David Banham and his family have decided to cease milk production on their farm near Skegness and to disperse the entire **Richpastures** herd in York Auction Centre on November 2nd. David is the third generation to milk cows at Richpastures with the herd founded back in the 1920s. It is a highly productive herd containing 125 cows & calved heifers, 10 served heifers due November onwards & 58 maiden heifers and calves at foot aged 20 months to recently born calves.

The herd is essentially a commercial herd with some registered animals and breeding has been in the hands of the Cogent Mating Plan. There are some splendid mature cows and 70+ young cows in lacts 1-3 including several fine specimens. The herd calves all year round with a level production curve and an NMR rolling average of around 10,000kg.

Management is uncomplicated with the cows housed in sand bedded **cubicles** and fed outside with a TMR and out-of-parlour feeders. No maize is grown now and the herd has access to winter housing all through the year. Milking is twice daily through a 16/16 herringbone parlour.

Main features: * **NMR average (2x) 10,300kg 4.2F 3.3P.**
 " **Latest weigh: 30.6kg / cow 4.17f 3.38p SCC = 152**
 " **64 x 10,000 litre cows (incl. 27 x 12-16,000 litre**
 producers)
 " **36 calved July - September**
 " **27 due October - November**
 " **29 due December - February**

Although the majority of the cattle are not registered, they are pure bred with sound, well established blood lines with families from Chapelry, Scrayingham & Wold included. Cogent bulls have been successfully used with young stock by such as **Bakombre, Twist, Wiltor Cruise, End-Story, Lanvin, Goodwhone & Relough Dolmio**. 25 are in calf to the impressive British Blue stock bull with others bred to Trump, Placebo, Goodwhone & Wiltor Hurricane.

These are clearly productive cattle with impressive records and with an enviable health status from a TB4 area. With the prospects for dairy farmers better than it has been for some time, this is a sale not to be missed.

HEALTH STATUS

TB The herd is in a TB4 testing area and has never had a case. The last test (all clear) was in the spring of 2016.

VACCINATIONS. None

JOHNES DISEASE herd is random tested twice a year. No positives in herd.

DRY COW THERAPY Orbenin Extra Dry & Orbeseal Teat Sealant
