

YORK MACHINERY SALES

will now be running

TIMED ONLINE AUCTIONS

It is not known how long it will be before we can return to our traditional Machinery Sales and as such it is our intention to run timed online auctions in the meantime.

Online auctions have proved a successful and popular alternative to the traditional auction and have been widely used for a long time.

The sale process is very similar with entry forms submitted and catalogued; lots delivered to the saleground and set out with lot numbers; on-site viewing available; online catalogue and photographs of each lot; bidding is then online through ibidder and Bidspotter, which we can help you with if required; then invoicing, payment and collection as usual.

Initially entries will be open to:

- **Auction 7** – tractors, forklifts, plant, quads
- **Auction 6** – machinery and trailers
- **Auction 5** – hedgers, loaders, buckets, livestock equipment.
- **Auction 4A** – mowers and groundcare

The timetable for our first sale is as follows:

- Entry form closing date: 31st March
- Delivery of lots: 4th, 6th & 7th April
- Catalogue online: 6th April
- On-site viewing: 8th & 9th April
- Online auction begins: 9th April
- Online auction closes: 14th April at midday.
